ABC of FNAC

NORTHERN REGION

FINE NEEDLE ASPIRATION CYTOLOGY SYMPOSIUM 2019

17 MARCH 2019
Pusat Pendidikan Lanjutan
Hospital Sultanah Bahiyah
ALOR SETAR, KEDAH

INTRODUCTION

Fine Needle Aspiration Cytology (FNAC) is a subdivision of cytology services provided by the pathology department in hospitals. It is one of the least invasive biopsy methods that have contributed many clinical decisions for patient management.

FNAC is optimum in its sensitivity and specificity with a well-trained personnel, from the physician that performs the procedure, the technician that prepares the slides and the pathologist that interprets the findings. Thus, training is essential to make FNAC as one of the preferable methods in advocating the diagnosis of patients.

OBJECTIVE

1. Improve knowledge in basic FNA sampling technique and sample handling.
2. Promoting correct FNAC technique.
3. Keeping abreast with current updates on breast and salivary gland cytology.

Target Participants:

Medical staffs of Government and Private Sectors in Kedah, Penang, Perlis and Perak.
